An online webinar on Industry 4.0 was majorly focused on the digital transformation of manufacturing/production and related industries and value creation processes. Industry 4.0 is used interchangeably with the fourth industrial revolution and represents a new stage in the organisation and control of the industrial value chain.

The webinar mostly focused on the industry revolution in the following broad areas consisting of :

1. Bigdata, Cloud Computing, Machine Learning (ML) and Internet of Thing (IOT)
2. Robotics Mechatronics, Automation Industry, web applications etc.
3. It widely covers the Impact of Industry 4.0 on Economy, Business, National and Global, Society and Individual etc.
4. It also focused on top 10 skills of Industry 4.0.

This webinar was attended by the students and staff of PVGCOE Nashik.
